LM 3.1A Chapter 3 Parent Letter

Dear Parents,

Your child is learning how to add and subtract. In first grade, adding and subtracting are introduced at a concrete level; children use objects to find the sums and differences before they are expected to memorize the facts. Your child is using manipulatives in class to learn addition and subtraction facts. Throughout this chapter you will notice the written practice available for your child. Use the pages your child

brings home to review addition and subtraction facts.

Reviewing facts with flash cards is also helpful. You may also use small objects, such as buttons or toothpicks, as counters to aid in problem solving.

As opportunities arise, help your child relate normal experiences to number sentences. For example, if you are having two guests for dinner, ask your child a question similar to the following: *There are four people in our family and two more are coming for dinner. How many will that be altogether?* Help your child determine whether to add or to subtract to solve the problem. Then have your child state the addition sentence " $4 + 2 = 6$." Such practice is invaluable to your child at this stage of learning.
